# YOUR SEARCH FOR THE PERFECT EXPERIENCE

---

Your company deserves to shine. Let your brand come back in the small things to make the experience a whole.

The bathroom is not the first place that comes to mind for the brand experience. Even if it is the most important place for your guests to come to themselves. Help your customers with this and make the perfect choices in your atmosphere.

## **Pink velvet** S-FA61313

Top note: Bergamot, Withered  
Mid note: Rose, Violet  
Base note: Cedar, Sandalwood, Amber, Musky

## **FORMULATION**

We have two types of formulations in our standard offer. Our no-nonsense (S) formulation and refined line (A) that is enriched with, among other things, organic argan oil. Both are transparent or white in color, depending on the product.

## **UNIQUE**

Working out your specific wishes is certainly also an option. Do you prefer a foaming, colored formulation, specific ingredient or own fragrance? Discuss your wishes with us and we will get to work. Keep in mind extra development time and costs.

STRAW

MATT  
WHITE

# LARGE PACKAGING

The choice for minis or large packages is often clear. From there you can look at the content. For minis, the choice for 30 - 50 ml is very common. With the larger packages we usually talk about 300 - 500ml.

## BOTTLES

Because bottles are (usually) not taken by guests, and a bottle can last for a month on average, the decrease is much lower. That is why we have made a standard range, where you can personalize the bottles from 1,000 pieces per product type. If you want a custom-made bottle, you can do that from 10,000 bottles for the entire line, 1,000 pieces per product.

BLACK POWDER COATING

# BOTTLE HOLDERS

---

## HOLDERS

Matching holders are available for every standard bottle. For the FN400 there is a wide choice of holders from single to triple. Available in white, black and metal color.

## USAGE

The holders are made of stainless steel. The bottle fits well in the holder and it is easy to replace. We do not recommend cleaning the containers with chlorine-containing agents. They are easy to hang using the drill holes or to stick.

## DECREASE

The single and double holders in black and metal are stock products. Other holders are on request.

# TUBES / BOTTLES

---

## MINIS

For the minis, the purchase for tubes is around 5,000 and bottles go per 10,000 pieces. With the minis you have many options, so that it really becomes a product that suits you.

## COLORS

The tubes and bottles can easily be made in the desired color. The closures are often also possible to color as desired. Prefer (some) transparency? No problem!

## RECYCLED PLASTIC

Our bottles are made from recyclable plastic. As long as we separate it properly, it is a good recyclable product. Now you also have the choice to make your bottles from recycled plastic. Recycled plastic does have a light grey / green color which can be seen in colorless and white bottles.

# TRAVEL BOX

Custom made box for the mini's of your choice

# SETS

---

## BOX

A traditional box, filled with tubes or bottles, is ideal for quick expenses. The contents are firmly packed and do not just fall out. Orders from 5,000 pieces.

## BOX WITH LID

Removing a lid from a box gives the experience of opening a present. That exciting feeling makes it extra fun as a children's set. But can also be filled with 4 items of your choice as a amenities set. Would you like to know if the set has been used? Add a seal!  
Orders from 5,000 pieces.

## SLEEVE BOX

A sleeve box presents the contents in an elegant way. With a bottom elevation you make the products shine even more!  
Orders from 5,000 pieces.

# DRY AMENITIES

## SOAP BLOCK

The best packaging for a soap is a box or sachet. Soaps can be made in different shapes and with, for example, your logo. Keep in mind a fixed price for the mold costs. A soap can also be wrapped in wax paper. Finishing with a sticker or sleeve is a must for this.

## BOXES

A neatest appearance is created by unity. The sleek shape of a box helps with that. Choose a matte or shiny look. Purchase from 5,000 pieces.

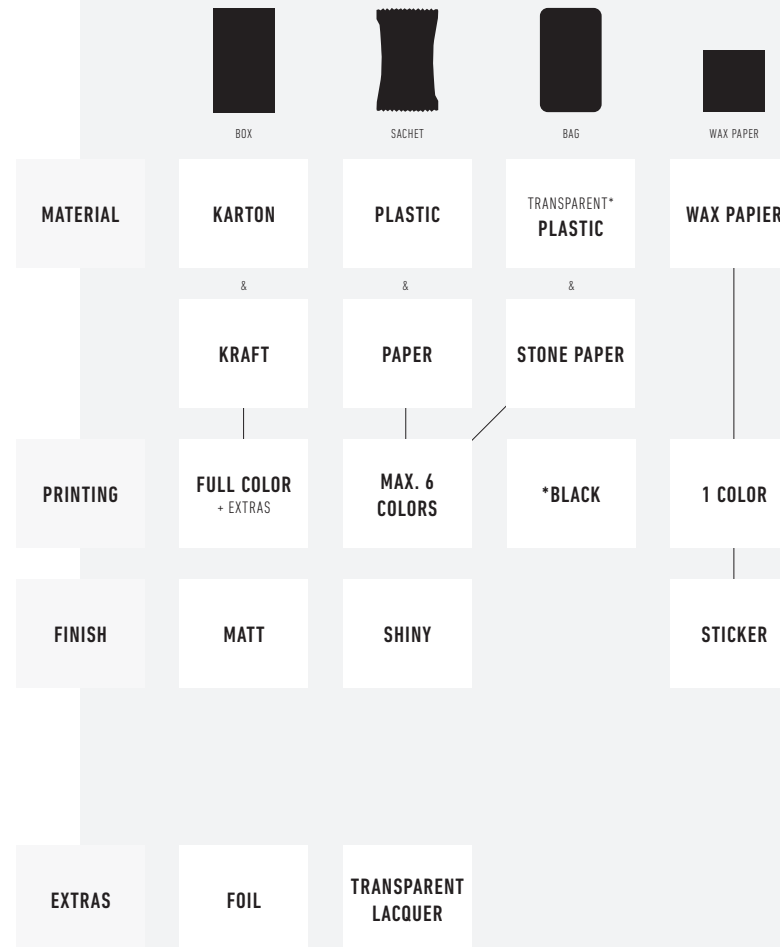

## SACHET

The advantage of a sachet is that it is clearly visible when the product has been opened and that it is resistant to water, which is very nice for housekeeping.

## BAG

A thin transparent bag immediately shows what kind of product is in it. As a result, printing is not necessary and it does offer optimum hygiene.

Stone paper is a unique type of paper. This is because it is made of stone dust, so no trees have to be felled. Stone paper can withstand water well, making it an optimal material for the bathroom.

# SLIPPER

Nice warm feet in style

FLIP FLOP  
TERRY COTTON

MORE ECOLOGICAL

# SLIPPERS

## SLIPPERS

The 3 standard shapes of slippers are available from 5,000 pieces. Our slippers are 29 cm, which is suitable for sizes 39-43.

## PRINTING

The fabric can be printed in full color on both the strap and footbed. A label can be fabric or rubber. And can be sewn to the footbed as well as a label along the edge of the slipper. An embroidered logo is very refined.

## FABRIC COLORS

Fabric coloring is a complicated process. The numbers for a specific color is 30,000 pieces. Because these numbers are often too many, we can look for a similar existing color so that we can offer a decrease of 5,000 pieces.

## SOLE

An EVA sole is sturdier and more durable than a doth cloth sole, but looks slightly less refined.

## PACKAGING

The most common packaging for the slippers is a paper band. A little more surprise is created with a (printed) ribbon. Real luxury is created by packing the slippers in a fabric bag.
